

The Filter Dial Valve Settings

- **FILTER/ FILTRATION** - Normal filtering position.
- **BACKWASH** - Cleans the filter sand (generally run for 3-5min).
- **RINSE** – Stabilizing/resetting the filter sand (run for 30-60sec after backwashing).
- **WASTE** - For vacuum cleaning the bottom of the pool directly to drain (for algae or large debris), or for emptying the pool bypassing filter sand.
- **CLOSED/WINTER** – No water coming into filter - used during maintenance and winterizing.
- **RECIRCULATE/CIRCULATION** - Pumping water directly to and from the pool (no filtering).
